

AMANDA J KENDAL-BROWN

Design Systems Engineer | Frontend Engineer | UX Engineering

+1-305-586-8344 @ amanda.kendalbrown@gmail.com Fairfax, VA 22033, United States

SUMMARY

Design Systems Engineer with 10+ years of experience designing and developing scalable, user-centered digital products. I thrive at the intersection of design and frontend engineering, partnering with Product, Design, and Engineering teams to transform ideas into accessible, reusable, and production-ready experiences. Combining graduate-level Human-Computer Interaction training with extensive frontend expertise, I bring a systems-thinking approach to component libraries, design systems, UX, and modern web development—helping bridge the gap between design vision and technical implementation.

KEY ACHIEVEMENTS

- Optimized Website Performance**
Cut page load times by **40%** through code optimization and performance tuning.
- Codebase Migration Completion**
Led a migration of **150,000+ lines** of JavaScript to TypeScript, improving stability and maintainability.
- Enhanced SEO Discoverability**
Boosted user engagement by **35%** through improved SEO strategies and site structure.
- Optimized API Performance**
Reduced average API response times by **200ms**, enhancing overall user experience.
- Figma Prototype Design**
Created high-fidelity Figma prototypes that clarified UI flows and improved usability.

EXPERIENCE

Senior Software Engineer, Front End

Capital One 11/2025 - Present McLean, VA

- Partnered with product designers and engineers to translate design concepts into responsive, production-ready interfaces across multiple application containers.
- Implemented and evolved the Connex Design System by building reusable Vue components that improved UI consistency, accessibility, and developer adoption.
- Contributed to the Lifecycle Modernization initiative by migrating legacy Vue components to TypeScript.
- Collaborated with a cross-functional Agile team of 4 engineers to deliver features and platform enhancements.
- Performed code reviews and championed front-end best practices to improve code quality.
- Built scalable, accessible front-end solutions using Vue, TypeScript, and modern web technologies.

Web Developer III

Automox 04/2021 - 08/2025 Chandler, AZ

- Designed and implemented reusable UI components that accelerated feature delivery by 30% while improving consistency across products.
- Engineered responsive web applications with Storyblok, improving performance scores by 20-25%.
- Maintained RESTful API endpoints handling thousands of daily requests.
- Led a 150K+ line TypeScript migration, reducing production bugs by approximately 40%.
- Created high-fidelity Figma prototypes, collaborated with stakeholders on UX direction, and reduced design approval cycles by nearly 50%.
- Coordinated development across 5+ time zones to hit sprint goals consistently.

EDUCATION

MS Human Computer Interaction

DePaul University

2017 - 2019 Chicago, IL

- Completed 28.5 credits toward MS in Human-Computer Interaction.

GPA
3.75 / 4.0

MS Computer Science

Northeastern Illinois University

2014 - 2015 Chicago, IL

- Completed 24 credits toward MS in Computer Science.

GPA
3.5 / 4.0

BA Music

University of Iowa

2007 - 2012 Iowa City, IA

DESIGN SYSTEMS & TECHNICAL SKILLS

Frontend & UI Development

React, Next.js, Vue, React Native, Electron, TypeScript, JavaScript, HTML, CSS, SCSS, Material UI, Tailwind CSS, Bootstrap, Component Libraries

Design Systems & UX

Figma, Sketch, Adobe XD, Axure, FullStory, Design Tokens, Figma-to-Code Workflows, Interaction Design, User-Centered Design, Responsive Design, Accessibility (WCAG, WAI-ARIA), Design Documentation, Design Specifications

Web Architecture & Performance

REST APIs, GraphQL, Cloudflare Pages & Workers, Core Web Vitals, SEO, Performance Optimization, Systems Thinking

EXPERIENCE

Application Developer

Oracle 📅 11/2015 - 04/2021 📍 Chicago, IL

- Converted 300+ client files into RML templates with 99.9% formatting accuracy.
- Enhanced backend Python/SQL components supporting 20+ enterprise accounts.
- Validated deployments via Jenkins, achieving a 100% QA success rate.
- Resolved 10–15 complex JIRA tickets per week, reducing backlog by 30–35%.
- Elevated code quality through regular peer reviews and documentation updates.

Application Programmer V

Bank of America 📅 10/2018 - 06/2019 📍 Chicago, IL

- Improved a React + Electron app used by 100+ traders, cutting load times by 20%.
- Automated ETL workflows, reducing manual effort by 60% and halving error rates.
- Refactored React components to reduce bundle size by 15% and improve UI speed.
- Shortened bug resolution time from 3 days to 1 through cross-stack troubleshooting.
- Contributed to Agile sprints with 12 engineers, meeting 100% of deliverables.

Graduate Assistantship

Northeastern Illinois University 📅 09/2015 - 11/2015 📍 Chicago, IL

- Produced marketing materials for 20+ campus events, raising attendance by 15%.
- Coordinated events serving 500+ students with campus staff.
- Guided students to academic support resources, reducing follow-ups by 25%.

Center Consultant

FedEx Office 📅 07/2013 - 09/2015 📍 Countryside, IL

- Processed 50+ print and shipping orders daily with 99% accuracy.
- Advised customers on project needs and solutions, improving satisfaction scores.
- Operated and maintained 10+ pieces of printing and finishing equipment.
- Trained 5+ new hires on systems, service, and data privacy protocols.

FEATURED PROJECTS

Vibekit

[Live Site](#) - [GitHub Repo](#)

Tools: TypeScript • React • Component Library

- Designed and built a reusable React component library focused on accessibility, reusability, and scalable design-system architecture.
- Implemented typed APIs with TypeScript to improve developer experience and maintainability.
- Focused on design-system consistency, documentation, and scalable frontend architecture.

AI Travel Agent

[Live Site](#) - [GitHub Repo](#)

Tools: TypeScript • Cloudflare Pages • Cloudflare Workers • OpenAI API

- Developed a responsive React application consuming external REST APIs with sea.
- Built an AI-powered travel planner integrating LLMs with real-time weather, flight, and hotel data.
- Developed serverless APIs and Supabase-backed persistence to deliver personalized travel recommendations.
- Optimized data fetching and application architecture for responsive user interactions.

REST Countries API

[Live Site](#) - [GitHub Repo](#)

Tools: React • TypeScript • REST APIs • Vite

- Developed a responsive React application consuming external REST APIs with search, filtering, and region-based navigation.
- Implemented reusable components, state management, and accessible UI patterns.
- Prioritized performance, responsive design, and clean component architecture.

DESIGN SYSTEMS & TECHNICAL SKILLS

Development Tools

Git, GitHub, GitHub Actions, GitHub Copilot, VS Code, Claude AI, Windsurf IDE, Terminal (Bash), npm, Vite, Jenkins, Splunk, Netlify, Google Cloud

Testing

Playwright, Jest, Mocha

DEVELOPMENT PROCESS & SOFT SKILLS

Agile & Project Management

Agile Methodology, Scrum, Sprint Planning, Requirements Gathering, Stakeholder Communication, JIRA, Monday.com

Collaboration & Team Practices

Cross-Functional Collaboration, Peer Code Reviews, Training & Mentoring, Technical Writing

Problem-Solving & Adaptability

Troubleshooting, Problem-Solving, Time Management, Attention to Detail, Adaptability, Customer Service
