

AMANDA J KENDAL-BROWN

Frontend Engineer | Product Design Systems | UX Engineering

+1-305-586-8344 @ amanda.kendalbrown@gmail.com Chandler, AZ 85224, United States

SUMMARY

Frontend Engineer with 10+ years of experience building scalable, user-centered applications with React and TypeScript. I combine strong engineering execution with UX training through graduate-level HCI coursework and hands-on design experience in Figma, Sketch, and Axure. I focus on reusable component systems, design-to-code consistency, accessibility, and high-performing interfaces in cross-functional product teams.

KEY ACHIEVEMENTS

-  **Optimized Website Performance**
Cut page load times by **40%** through code optimization and performance tuning.
-  **Codebase Migration Completion**
Led a migration of **150,000+ lines** of JavaScript to TypeScript, improving stability and maintainability.
-  **Enhanced SEO Discoverability**
Boosted user engagement by **35%** through improved SEO strategies and site structure.
-  **Optimized API Performance**
Reduced average API response times by **200ms**, enhancing overall user experience.
-  **Figma Prototype Design**
Created high-fidelity Figma prototypes that clarified UI flows and improved usability.

EXPERIENCE

Senior Software Engineer, Front End

- Capital One 11/2025 - Present McLean, VA
- Led responsive UI development across multiple application containers for the Empath platform.
 - Implemented the Connex Design System using reusable Vue components to improve consistency and maintainability.
 - Contributed to the Lifecycle Modernization initiative by migrating legacy Vue components to TypeScript.
 - Collaborated with a cross-functional Agile team of 4 engineers to deliver features and platform enhancements.
 - Performed code reviews and championed front-end best practices to improve code quality.
 - Built scalable, accessible front-end solutions using Vue, TypeScript, and modern web technologies.

Web Developer III

- Automox 04/2021 - 08/2025 Chandler, AZ
- Implemented reusable UI components, cutting feature build time by approximately 30%.
 - Engineered responsive web applications with Storyblok, improving performance scores by 20-25%.
 - Maintained RESTful API endpoints handling thousands of daily requests.
 - Led a 150K+ line TypeScript migration, reducing production bugs by approximately 40%.
 - Produced Figma prototypes that sped up design approvals by nearly 50%.
 - Coordinated development across 5+ time zones to hit sprint goals consistently.

EDUCATION

MS Human Computer Interaction

- DePaul University GPA **3.75 / 4.0**
- 2017 - 2019 Chicago, IL
- Completed 28.5 credits toward MS in Human-Computer Interaction.

MS Computer Science

- Northeastern Illinois University GPA **3.5 / 4.0**
- 2014 - 2015 Chicago, IL
- Completed 24 credits toward MS in Computer Science.

BA Music

- University of Iowa
- 2007 - 2012 Iowa City, IA

CERTIFICATIONS

TECHNICAL & FRONT-END SKILLS

- Languages & Frameworks
React.js, Next.js, React Native, Electron, TypeScript, JavaScript, Python, Java, Node.js, SQL
- Web & API Development
RESTful APIs, GraphQL, Core Web Vitals
- Build & Tools
Vite, Jenkins, GitHub Actions, Netlify, Google Cloud, GitHub, npm, GitHub Copilot
- Testing & QA
Jest, Mocha
- UI & Styling
Material UI, Tailwind, Bootstrap, SCSS, HTML, CSS
- Design & Prototyping
Figma, Adobe XD, Sketch, Axure

EXPERIENCE

Application Developer

Oracle 📅 11/2015 - 04/2021 📍 Chicago, IL

- Converted 300+ client files into RML templates with 99.9% formatting accuracy.
- Enhanced backend Python/SQL components supporting 20+ enterprise accounts.
- Validated deployments via Jenkins, achieving a 100% QA success rate.
- Resolved 10–15 complex JIRA tickets per week, reducing backlog by 30–35%.
- Elevated code quality through regular peer reviews and documentation updates.

Application Programmer V

Bank of America 📅 10/2018 - 06/2019 📍 Chicago, IL

- Improved a React + Electron app used by 100+ traders, cutting load times by 20%.
- Automated ETL workflows, reducing manual effort by 60% and halving error rates.
- Refactored React components to reduce bundle size by 15% and improve UI speed.
- Shortened bug resolution time from 3 days to 1 through cross-stack troubleshooting.
- Contributed to Agile sprints with 12 engineers, meeting 100% of deliverables.

Graduate Assistantship

Northeastern Illinois University 📅 09/2015 - 11/2015 📍 Chicago, IL

- Produced marketing materials for 20+ campus events, raising attendance by 15%.
- Coordinated events serving 500+ students with campus staff.
- Guided students to academic support resources, reducing follow-ups by 25%.

Center Consultant

FedEx Office 📅 07/2013 - 09/2015 📍 Countryside, IL

- Processed 50+ print and shipping orders daily with 99% accuracy.
- Advised customers on project needs and solutions, improving satisfaction scores.
- Operated and maintained 10+ pieces of printing and finishing equipment.
- Trained 5+ new hires on systems, service, and data privacy protocols.

FEATURED PROJECTS

Vibekit

[Live Site](#) - [GitHub Repo](#)

Tools: TypeScript • React • Component Library

- Designed and built a reusable UI component library with composable, accessible React components.
- Implemented typed APIs with TypeScript to improve developer experience and maintainability.
- Focused on design-system consistency, documentation, and scalable frontend architecture.

AI Travel Agent

[Live Site](#) - [GitHub Repo](#)

Tools: TypeScript • Cloudflare Pages • Cloudflare Workers • OpenAI API

- Developed a responsive React application consuming external REST APIs with sea
- Built an AI-powered travel planner integrating LLMs with real-time weather, flight, and hotel data.
- Developed serverless APIs and Supabase-backed persistence to deliver personalized travel recommendations.
- Optimized data fetching and application architecture for responsive user interactions.

REST Countries API

[Live Site](#) - [GitHub Repo](#)

Tools: React • TypeScript • REST APIs • Vite

- Developed a responsive React application consuming external REST APIs with search, filtering, and region-based navigation.
- Implemented reusable components, state management, and accessible UI patterns.
- Prioritized performance, responsive design, and clean component architecture.

TECHNICAL & FRONT-END SKILLS

UX Practices

Interaction Design, Responsive Design, User-Centered Design, Accessibility (a11y), WCAG, WAI-ARIA, Performance Optimization

DEVELOPMENT PROCESS & SOFT SKILLS

Agile & Project Management

Agile Methodology, Scrum, Sprint Planning, Stakeholder Communication, Requirements Gathering, JIRA, Monday

Collaboration & Team Practices

Peer Code Reviews, Training & Mentoring, Cross-Functional Collaboration, Documentation & Technical Writing

Problem-Solving & Adaptability

Troubleshooting, Problem-Solving, Time Management, Attention to Detail, Adaptability, Customer Service
